

## Mouse E3 ubiquitin-protein ligase HUWE1 ELISA Kit | Huwe1 elisa kit

Mouse E3 ubiquitin-protein ligase HUWE1 ELISA Kit

CATALOG #  
**AAA100666**

REACTIVITY  
**Mouse**

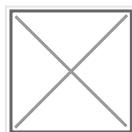

### PRODUCT SYNONYMS

E3 ubiquitin-protein ligase HUWE1; Mouse E3 ubiquitin-protein ligase HUWE1 ELISA Kit; Huwe1/Upstream regulatory element-binding protein 1/URE-B1/URE-binding protein 1/Mcl-1 ubiquitin ligase E3/Large structure of UREB1/LASU1/Homologous to E6AP carboxyl terminus homologous protein 9/HectH9/ARF-binding protein 1/ARF-BP1/HECT; UBA and WWE domain-containing protein 1; Huwe1 elisa kit

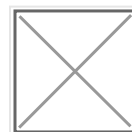

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                              |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Mouse                                                                                                                                                        |
| Sequence Length         | 4374                                                                                                                                                         |
| Assay Type              | Sandwich ELISA, Double Antibody                                                                                                                              |
| Samples                 | Serum, Plasma, Cell Culture Supernatant, cell or tissue lysate, Other liquid samples                                                                         |
| Detection Range         | 0.313-20ng/ml                                                                                                                                                |
| Sensitivity             | 0.188ng/ml                                                                                                                                                   |
| Preparation and Storage | Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C |

### ADDITIONAL INFORMATION

#### Related Product Information for Huwe1 elisa kit

Principle of the Assay||This kit was based on sandwich enzyme-linked immune-sorbent assay technology. anti-Mouse Huwe1 antibody was pre-coated onto 96-well plates. And the biotin conjugated anti-Mouse Huwe1 antibody was used as detection antibodies. The standards, test samples and biotin conjugated detection antibody were added to the wells subsequently, and wash with wash buffer. HRP-Streptavidin was added and unbound conjugates were washed away with wash buffer. TMB substrates were used to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that changed into yellow after adding acidic stop solution. The density of yellow is proportional to the Mouse Huwe1 amount of sample captured in plate. Read the O.D. absorbance at 450nm in a microplate reader, and then the concentration of Mouse Huwe1 can be calculated.
