

Mouse alpha1-Acid glycoprotein ELISA Kit | alpha1-AGP elisa kit

Mouse alpha1-Acid glycoprotein ELISA Kit

CATALOG #
AAA100679

REACTIVITY
Mouse

PRODUCT SYNONYMS

alpha1-Acid glycoprotein; Mouse alpha1-Acid glycoprotein ELISA Kit; alpha1-AGP/ORM1/AGP/AGP1/AGPA/ORM1/Orosomucoid/AGP 1/AGP1/alpha-1-acid glycoprotein 1/AGP-A/OMD 1/ORM/orosomucoid 1/Orosomucoid-1/orosomucoid-1; a1-Acid glycoprotein; alpha1-AGP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	Specifically recognize alpha1-AGP, no obvious cross reaction with other analogues
Sequence Length	34
Assay Type	Sandwich
Samples	Serum, plasma, cell culture supernatant and other biological samples
Detection Range	6.25-400ng/ml
Sensitivity	3.75ng/ml
Intra-assay Precision	Intra-assay Precision: samples with low, medium and high concentration are tested 20 times on same plate.
Inter-assay Precision	Inter-assay Precision: samples with low, medium and high concentration are tested 20 times on three different plates.
Preparation and Storage	Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C

ADDITIONAL INFORMATION

Related Product Information for alpha1-AGP elisa kit	Background: alpha1-Acid glycoprotein, also known as orosomucoid, is an acute-phase glycoprotein synthesized primarily by the liver. It modulates the immune response, inflammation, and drug metabolism. alpha1-Acid glycoprotein binds to various ligands, including drugs, lipids, and cytokines, and is involved in mediating their effects. Principle of the Assay: This kit was based on sandwich enzyme-linked immune-sorbent assay technology. Anti alpha1-AGP antibody was pre-coated onto the 96-well plate. The biotin conjugated anti alpha1-AGP antibody was used as the detection antibody. The standards and pilot samples were added to the wells subsequently. After incubation, unbound conjugates were removed by wash buffer. Then, biotinylated detection antibody was added to bind with alpha1-AGP conjugated on coated antibody. After washing off unbound conjugates, HRP-Streptavidin was added. After a third washing, TMB substrates were added to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that turned yellow after adding a stop solution. Read the O.D. absorbance at 450nm in a microplate reader. The concentration of alpha1-AGP in the sample was calculated by drawing a standard curve. The concentration of the target substance is proportional to the OD450 value.

NCBI AND UNIPROT INFORMATION

NCBI GI #	3868933
NCBI Official Full Name	alpha1-acid glycoprotein, partial

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
