

Human Melanocyte antibody ELISA Kit | MCAb elisa kit

Human Melanocyte antibody ELISA Kit

CATALOG #
AAA101342

REACTIVITY
Human

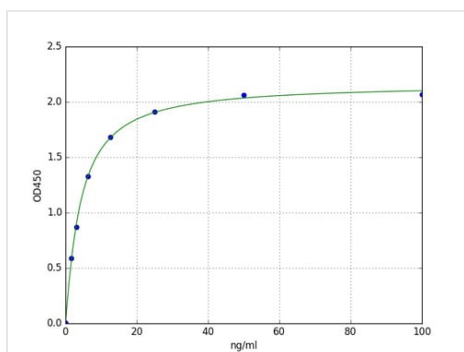

PRODUCT SYNONYMS

Melanocyte antibody; Human Melanocyte antibody ELISA Kit; MCAb (Melanocyte antibody); MCAb elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Assay Type	Sandwich ELISA, Double Antibody
Samples	Serum, Plasma, Cell Culture Supernatant, cell or tissue lysate, Other liquid samples
Detection Range	1.563-100ng/ml
Sensitivity	0.938ng/ml
Preparation and Storage	Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C

IMAGES

Results of a typical standard run of a Human MCAb ELISA Kit are shown below. This standard curve was generated at our lab for demonstration purpose only. Each user should obtain their own standard curve as per experiment. (N/A=not applicable)

X	U/ml	0	15.6	31.2	62.5	125	250	500	1000
Y	OD450	0.033	0.102	0.166	0.349	0.617	1.135	1.820	2.275

ADDITIONAL INFORMATION

Related Product Information for MCAb elisa kit

Principle of the Assay||This kit was based on sandwich enzyme-linked immune-sorbent assay technology. Anti-Human MCAb antibody was pre-coated onto 96-well plates. And the biotin conjugated anti-Human MCAb antibody was used as detection antibodies. The standards, test samples and biotin conjugated detection antibody were added to the wells subsequently, and wash with wash buffer. HRPStreptavidin was added and unbound conjugates were washed away with wash buffer. TMB substrates were used to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that changed into yellow after adding acidic stop solution. The density of yellow is proportional to the Human MCAb amount of sample captured in plate. Read the O.D. absorbance at 450nm in a microplate reader, and then the concentration of Human MCAb can be calculated.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
