

## Human Neuromedin-K receptor ELISA Kit | TACR3 elisa kit

Human Neuromedin-K receptor ELISA Kit

CATALOG #  
**AAA101652**

REACTIVITY  
**Human**

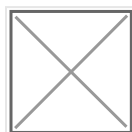

### PRODUCT SYNONYMS

Neuromedin-K receptor; Human Neuromedin-K receptor ELISA Kit; TACR3 (Tachykinin Receptor 3)/Neuromedin-K receptor/NKR/NK-3 receptor/NK-3R/Neurokinin B receptor; TACR3 elisa kit

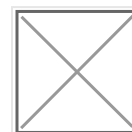

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                              |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                        |
| Sequence Length         | 465                                                                                                                                                          |
| Assay Type              | Sandwich ELISA, Double Antibody                                                                                                                              |
| Samples                 | Serum, Plasma, Cell Culture Supernatant, cell or tissue lysate, Other liquid samples                                                                         |
| Detection Range         | 0.781-50ng/ml                                                                                                                                                |
| Sensitivity             | 0.469ng/ml                                                                                                                                                   |
| Preparation and Storage | Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C |

### ADDITIONAL INFORMATION

#### Related Product Information for TACR3 elisa kit

Principle of the Assay||This kit was based on sandwich enzyme-linked immune-sorbent assay technology. Anti-Human TACR3 antibody was pre-coated onto 96-well plates. And the biotin conjugated anti-Human TACR3 antibody was used as detection antibodies. The standards, test samples and biotin conjugated detection antibody were added to the wells subsequently, and wash with wash buffer. HRP-Streptavidin was added and unbound conjugates were washed away with wash buffer. TMB substrates were used to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that changed into yellow after adding acidic stop solution. The density of yellow is proportional to the Human TACR3 amount of sample captured in plate. Read the O.D. absorbance at 450nm in a microplate reader, and then the concentration of Human TACR3 can be calculated.

### NCBI AND UNIPROT INFORMATION

|                     |                |
|---------------------|----------------|
| NCBI GI #           | 825695         |
| NCBI GeneID         | 6870           |
| UniProt Accession # | P29371; Q0P510 |
| Molecular Weight    | 52,202 Da      |

|                                  |                                |
|----------------------------------|--------------------------------|
| NCBI Official Full Name          | neuromedin K receptor          |
| NCBI Official Synonym Full Names | tachykinin receptor 3          |
| NCBI Official Symbol             | TACR3                          |
| NCBI Official Synonym Symbols    | NKR; HH11; NK3R; NK-3R; TAC3RL |
| NCBI Protein Information         | neuromedin-K receptor          |
| UniProt Protein Name             | Neuromedin-K receptor          |
| UniProt Gene Name                | <b>TACR3</b>                   |
| UniProt Synonym Gene Names       | NK3R; TAC3R; NKR; NK-3R        |
| UniProt Entry Name               | NK3R_HUMAN                     |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
