ADDITIONAL INFORMATION

Related Product Information for anti-SLC5A5 antibody	**Background Info:** Mapped to AA 625-643 of hNIS. Apparent mol. wt of 97kD,non-glycosylated version at 68kD. Other minor bands associated with hNIS at160kDa, and degradation products at ~30 kDa, and ~15kDa. **Scientific Background:** The sodium iodide symporter (NIS) is an ion pump that actively transports iodide across the basolateral membrane into thyroid epithelial cells (1, 2). This is important step in the process of iodide organificaton and the formation of triiodothyronine and thyroxine (3).
