

Mouse Hsp90 Monoclonal Antibody | anti-NF1P5 antibody

Hsp90 Antibody: RPE

CATALOG #	HOST	REACTIVITY	APPLICATIONS
AAA103074	Mouse	Human, Rabbit, Rat, Mouse, Chicken, Achyla, Wheat Germ, Sf9 cell line	Immunohistochemistry, Western Blot

PRODUCT SYNONYMS

Hsp90; Monoclonal Antibody; Hsp90 Antibody: RPE; Hsp84; Hsp86; Hsp89; Hsp90Beta; Hsp90A; Hsp90AA1; Hsp90AB1; Hsp90B; Hsp90N; HspC1; HspC2; HspCA; HspCAL1; HspCAL4; HspCB; HspN; LAP2; anti-NF1P5 antibody

PRODUCT SPECIFICATIONS

Host	Mouse
Reactivity	Human, Rabbit, Rat, Mouse, Chicken, Achyla, Wheat Germ, Sf9 cell line
Clonality	Monoclonal
Isotype	IgG2b
Clone Number	AC-16
Form/Format	Protein G Purified
Concentration	1mg/mL (varies by lot)
Sequence Length	703
Applicable Applications for anti-NF1P5 antibody	IHC (Immunohistochemistry), WB (Western Blot)
Conjugate	RPE
Storage Buffer	PBS pH7.4, 50% glycerol, 0.09% sodium azide
Preparation and Storage	-20 degree C

IMAGES

IHC (Immunohistochemistry)

Immunohistochemistry analysis using Mouse Anti-Hsp90 Monoclonal Antibody, Clone AC-16. Tissue: inflamed colon. Species: Mouse. Fixation: Formalin. Primary Antibody: Mouse Anti-Hsp90 Monoclonal Antibody at 1:2000 for 12 hours at 4 degree C. Secondary Antibody: Biotin Goat Anti-Mouse at 1:2000 for 1 hour at RT. Counterstain: Mayer Hematoxylin (purple/blue) nuclear stain at 200 ul for 2 minutes at RT. Localization: Inflammatory cells. Magnification: 40x. Mostly inflammatory cells, some mucosa.

IHC (Immunohistochemistry)

Immunohistochemistry analysis using Mouse Anti-Hsp90 Monoclonal Antibody, Clone AC-16. Tissue: colon carcinoma. Species: Human. Fixation: Formalin. Primary Antibody: Mouse Anti-Hsp90 Monoclonal Antibody at 1:2000 for 12 hours at 4 degree C. Secondary Antibody: Biotin Goat Anti-Mouse at 1:2000 for 1 hour at RT. Counterstain: Mayer Hematoxylin (purple/blue) nuclear stain at 200 ul for 2 minutes at RT. Localization: Inflammatory cells. Magnification: 40x. Inflammatory cells.

ADDITIONAL INFORMATION

Related Product Information for anti-NF1P5 antibody	<p>Background Info: This antibody is reactive with both the constitutive and the inducible form of Hsp90. It does not bind to the native form and does not recognize Hsp90 from E.coli or yeast.</p> <p>Scientific Background: Hsp90 is a highly conserved and essential stress protein that is expressed in all eukaryotic cells. From a functional perspective, hsp90 participates in the folding, assembly, maturation, and stabilization of specific proteins as an integral component of a chaperone complex (1-4). Despite its label of being a heat-shock protein, hsp90 is one of the most highly expressed proteins in unstressed cells (1-2% of cytosolic protein). It carries out a number of housekeeping functions - including controlling the activity, turnover, and trafficking of a variety of proteins. Most of the hsp90-regulated proteins that have been discovered to date are involved in cell signaling (5-6). The number of proteins now known to interact with Hsp90 is about 100. Target proteins include the kinases v-Src, Wee1, and c-Raf, transcriptional regulators such as p53 and steroid receptors, and the polymerases of the hepatitis B virus and telomerase.⁵ When bound to ATP, Hsp90 interacts with co-chaperones Cdc37, p23, and an assortment of immunophilin-like proteins, forming a complex that stabilizes and protects target proteins from proteasomal degradation. In most cases, hsp90-interacting proteins have been shown to co-precipitate with hsp90 when carrying out immuno-adsorption studies, and to exist in cytosolic heterocomplexes with it. In a number of cases, variations in hsp90 expression or hsp90 mutation has been shown to degrade signaling function via the protein or to impair a specific function of the protein (such as steroid binding, kinase activity) <i>in vivo</i>. Ansamycin antibiotics, such as geldanamycin and radicicol, inhibit hsp90 function (7).</p>

NCBI AND UNIPROT INFORMATION

NCBI GI #	22086553
NCBI GeneID	4768
UniProt Accession #	Q8LLI5
Molecular Weight	80,185 Da
NCBI Official Full Name	heat shock protein Hsp90
NCBI Official Synonym Full Names	neurofibromin 1 pseudogene 5
NCBI Official Symbol	NF1P5
NCBI Official Synonym Symbols	NF1L5
UniProt Protein Name	Heat shock protein Hsp90
UniProt Entry Name	Q8LLI5_ACHAM

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
