

## Mouse TrpV3 Monoclonal Antibody | anti-Trpv3 antibody

TrpV3 Antibody: ATTO 594

| CATALOG # | HOST  | REACTIVITY        | APPLICATIONS                                           |
|-----------|-------|-------------------|--------------------------------------------------------|
| AAA103428 | Mouse | Human, Mouse, Rat | Immunoprecipitation, Immunocytochemistry, Western Blot |

### PRODUCT SYNONYMS

TrpV3; Monoclonal Antibody; TrpV3 Antibody: ATTO 594; VRL3; vanilloid receptor 2; transient receptor potential cation channel subfamily V member 3; sensitive channel TRPV3; 111003610Rik; MGC124324; MGC124325; Trpv3 heat sensitive channel; vanilloid receptor-related osmotically activated channel protein; anti-Trpv3 antibody

### PRODUCT SPECIFICATIONS

|-------------------------------------------------|------------------------------------------------------------------------|
| Host                                            | Mouse                                                                  |
| Reactivity                                      | Human, Mouse, Rat                                                      |
| Clonality                                       | Monoclonal                                                             |
| Isotype                                         | IgG2a                                                                  |
| Clone Number                                    | S15-39                                                                 |
| Form/Format                                     | Protein G Purified                                                     |
| Concentration                                   | 1mg/mL (varies by lot)                                                 |
| Sequence Length                                 | 791                                                                    |
| Applicable Applications for anti-Trpv3 antibody | IP (Immunoprecipitation), ICC (Immunocytochemistry), WB (Western Blot) |
| Conjugate                                       | ATTO 594                                                               |
| Storage Buffer                                  | PBS pH7.4, 50% glycerol, 0.09% sodium azide                            |
| Preparation and Storage                         | -20 degree C                                                           |

### IMAGES

#### ICC (Immunocytochemistry)

Immunocytochemistry/Immunofluorescence analysis using Mouse Anti-TrpV3 Monoclonal Antibody, Clone S15-39. Tissue: HaCaT cells. Species: Human. Fixation: Cold 100% methanol for 10 minutes at -20 degree C. Primary Antibody: Mouse Anti-TrpV3 Monoclonal Antibody at 1:100 for 1 hour at RT. Secondary Antibody: FITC Goat Anti-Mouse (green) at 1:50 for 1 hour at RT. Localization: Dotty staining in all cells. Some intermediate filament-like staining in some cells.

#### WB (Western Blot)

Western Blot analysis of Rat brain membrane lysate showing detection of TrpV3 protein using Mouse Anti-TrpV3 Monoclonal Antibody, Clone S15-39. Load: 15 ug. Block: 1.5% BSA for 30 minutes at RT. Primary Antibody: Mouse Anti-TrpV3 Monoclonal Antibody at 1:1000 for 2 hours at RT. Secondary Antibody: Sheep Anti-Mouse IgG: HRP for 1 hour at RT.

#### IHC (Immunohistochemistry)

Immunohistochemistry analysis using Mouse Anti-TrpV3 Monoclonal Antibody, Clone S15-39.  
Tissue: backskin. Species: Mouse. Fixation: Bouin's Fixative and paraffin-embedded. Primary Antibody: Mouse Anti-TrpV3 Monoclonal Antibody at 1:100 for 1 hour at RT. Secondary Antibody: FITC Goat Anti-Mouse (green) at 1:50 for 1 hour at RT. Localization: Filaggrin-like staining in upper layers. Dull lower layer cell staining. Some stain seen in hypodermis.

### ADDITIONAL INFORMATION

| <b>Related Product Information for anti-Trpv3 antibody</b> | <b>Background Info:</b> Detects ~70kDa.<br><br><b>Scientific Background:</b> The TRPV3 protein belongs to a family of non-selective cation channels that function in a variety of processes, including temperature sensation and vasoregulation. The thermo sensitive members of this family are expressed in subsets of sensory neurons that terminate in the skin, and are activated at distinct physiological temperatures. This channel is activated at temperatures between 22 and 40 degrees C. The gene lies in close proximity to another family member (TRPV1) gene on chromosome 17, and the two encoded proteins are thought to associate with each other to form heteromeric channels (3, 4). |
