Rabbit Calnexin-NT Polyclonal Antibody | anti-CANX antibody

Calnexin-NT Antibody: ATTO 488

CATALOG #	HOST	REACTIVITY	APPLICATIONS
AAA103703	**Rabbit**	**Human, Mouse, Rat, Bovine, Chicken, Dog, Guinea Pig, Hamster, Monkey, Pig, Rabbit, Sheep, Xenopus.**	**Immunofluorescence, Immunocytochemistry, Immunoprecipitation, Western Blot**

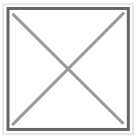
PRODUCT SYNONYMS

Calnexin-NT; Polyclonal Antibody; Calnexin-NT Antibody: ATTO 488; CANX; CNX; IP90; P90; anti-CANX antibody

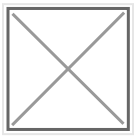
PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Human, Mouse, Rat, Bovine, Chicken, Dog, Guinea Pig, Hamster, Monkey, Pig, Rabbit, Sheep, Xenopus.
Clonality	Polyclonal
Form/Format	Rabbit Antiserum
Sequence Length	593
Applicable Applications for anti-CANX antibody	IF (Immunofluorescence), ICC (Immunocytochemistry), IP (Immunoprecipitation), WB (Western Blot)
Conjugate	ATTO 488
Storage Buffer	Rabbit Antiserum
Preparation and Storage	-20 degree C

IMAGES



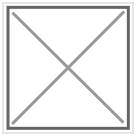
IHC (Immunohistochemistry)
Immunohistochemistry analysis using Rabbit Anti-Calnexin Polyclonal Antibody (SPC-127). Tissue: colon colitis. Species: Mouse. Fixation: Formalin. Primary Antibody: Rabbit Anti-Calnexin Polyclonal Antibody (SPC-127) at 1:100000 for 12 hours at 4 degree C. Secondary Antibody: Biotin Goat Anti-Rabbit at 1:2000 for 1 hour at RT. Counterstain: Methyl Green at 200uL for 2 min at RT. Localization: Inflammatory cells.



WB (Western Blot)
Western blot analysis of Rat tissue mix showing detection of Calnexin protein using Rabbit Anti-Calnexin Polyclonal Antibody (SPC-127). Load: 15 ugprotein. Block: 1.5% BSA for 30 minutes at RT. Primary Antibody: Rabbit Anti-Calnexin Polyclonal Antibody (SPC-127) at 1:5000 for 2 hours at RT. Secondary Antibody: Donkey Anti-Rabbit IgG: HRP for 1 hour at RT.

IHC (Immunohistochemisry)
Immunohistochemistry analysis using Rabbit Anti-Calnexin Polyclonal Antibody (SPC-127). Tissue: backskin. Species: Mouse. Fixation: Bouin's Fixative Solution. Primary Antibody: Rabbit Anti-Calnexin Polyclonal Antibody (SPC-127) at 1:100 for 1 hour at RT. Secondary Antibody: FITC Goat Anti-Rabbit (green) at 1:50 for 1 hour at RT. Localization: Upper layer staining and few basal cell cytoplasmic staining.

WB (Western Blot)
Western blot analysis of Human Cervical cancer cell line (HeLa) lysate showing detection of Calnexin protein using Rabbit Anti-Calnexin Polyclonal Antibody (SPC-127). Primary Antibody: Rabbit Anti-Calnexin Polyclonal Antibody (SPC-127) at 1:1000.



ICC (Immunocytochemistry)
Immunocytochemistry/Immunofluorescence analysis using Rabbit Anti-Calnexin Polyclonal Antibody (SPC-127). Tissue: Cervical cancer cell line (HeLa). Species: Human. Primary Antibody: Rabbit Anti-Calnexin Polyclonal Antibody (SPC-127) at 1:100. Secondary Antibody: FITC Goat Anti-Rabbit (green).

ADDITIONAL INFORMATION

Related Product Information for anti-CANX antibody	**Background Info:** Detects ~90kDa. **Scientific Background:** Calnexin, an abundant ~90kDa integral protein of the endoplasmic reticulum, is also referred to as IP90, p88 and p90 (1). It consists of a large 50kDa N-terminal calcium-binding luminal domain, a single transmembrane helix and a short acidic cytoplasmic tail (2, 3). Unlike its ER counterparts which have a KDEL sequence on their C-terminus to ensure ER retention (4), calnexin has positively charged cytosolic residues that do the same thing (3). Most ER proteins act as molecular chaperones and participate in the proper folding of polypeptides and their assembly into mulit-subunit proteins. Calnexin together with calreticulin, plays a key role in glycoprotein folding and its control within the ER, by interacting with folding intermediates via their mono-glycosylated glycans (5, 6). Calnexin has also been shown to associate with the major histocompatibility complex class I heavy chains, partial complexes of the T cell receptor and B cell membrane immunoglobulin (7).
