Sequence Length	129
Applicable Applications for anti-FSHB antibody	WB (Western Blot), IF (Immunofluorescence), FCM/FACS (Flow Cytometry)
Biological Significance	The pituitary glycoprotein hormone family includes follicle-stimulating hormone, luteinizing hormone, chorionicgonadotropin, and thyroid-stimulating hormone. All of these glycoproteins consist of an identical alpha subunit and a hormone-specific beta subunit. This gene encodes the beta subunit of follicle-stimulating hormone. In conjunction with luteinizing hormone, follicle-stimulating hormone induces egg and sperm production.
Cross-Reactivity	Human
Immunogen	FSHB antibody was raised in mouse using a full length recombinant protein of human FSHB (NP_001018090) produced in HEK293T cells, as the immunogen.
Preparation and Storage	Store at 4 degree C for short term storage. Aliquot and store at -20 degree C for long term storage. Avoid repeated freeze/thaw cycles.
