Biological Significance	NLN is a member of the metallopeptidase M3 protein family that cleaves neurotensin at the Pro10-Tyr11 bond, leading to the formation of neurotensin(1-10) and neurotensin(11-13). The encoded protein is likely involved in the termination of the neurotensinergic signal in the central nervous system and in the gastrointestin al tract.
Cross-Reactivity	Human, Rat, Monkey, Mouse
Immunogen	NLN antibody was raised in mouse using a full length recombinant protein of human NLN (NP_065777) produced in HEK293T cells, as the immunogen.
Preparation and Storage	Store at 4 degree C for short term storage. Aliquot and store at -20 degree C for long term storage. Avoid repeated freeze/thaw cycles.
