Biological Significance	This gene is one member of a family of sulfate/anion transporter genes. Family members are well conserved in their genomic (number and size of exons) and protein (aa length among species) structures yet have markedly different tissue expression patterns. This gene is expressed primarily in spermatocytes.
Cross-Reactivity	Human
Immunogen	SLC26A8 antibody was raised in rabbit using a recombinant protein fragment contain a sequence corresponding to a region within amino acids 613 and 850 of SLC26A8
Preparation and Storage	Store at 4 degree C for short term storage. Aliquot and store at -20 degree C for long term storage. Avoid repeated freeze/thaw cycles.
