Applicable Applications for anti-NUCB1 antibody	WB (Western Blot), IF (Immunofluorescence)
Biological Significance	Calnuc or NUCB1 belongs to the nucleobindin family. It is a major calcium-binding protein of the Golgi and is a good Golgi marker. It may be involved in calcium homeostasis. Calnuc also plays roles in regulation of levels of amyloid precursor protein (APP) and its proteolytic metabolites to further affect the patho/physiological functions of APP including Alzheimer's disease pathogenesis.
Cross-Reactivity	Human
Immunogen	NUCB1 antibody was raised in mouse using a full length recombinant protein of human NUCB1 (NP_006175) produced in HEK293T cells, as the immunogen.
Preparation and Storage	Store at 4 degree C for short term storage. Aliquot and store at -20 degree C for long term storage. Avoid repeated freeze/thaw cycles.
