

## anti-Mouse, Rat CK-18 Antibody | anti-CK-18 antibody

CK-18 Antibody

|                               |                                 |                                     |
|-------------------------------|---------------------------------|-------------------------------------|
| CATALOG #<br><b>AAA111039</b> | REACTIVITY<br><b>Mouse, Rat</b> | APPLICATIONS<br><b>Western Blot</b> |
|-------------------------------|---------------------------------|-------------------------------------|

### PRODUCT SYNONYMS

CK-18; CK-18 Antibody; anti-CK-18 antibody

### PRODUCT SPECIFICATIONS

|                                                 |                                                                                                                                         |
|-------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity                                      | Mouse, Rat                                                                                                                              |
| Clone Number                                    | 6-19                                                                                                                                    |
| Specificity                                     | This antibody is produced by immunizing mouse with a synthetic peptide (KLH-coupled) corresponding to near C-terminal residues of CK18. |
| Form/Format                                     | In 1*TBS (pH7.4), 0.5%BSA, 25%Glycerol.                                                                                                 |
| Sequence Length                                 | 423                                                                                                                                     |
| Applicable Applications for anti-CK-18 antibody | WB (Western Blot)                                                                                                                       |
| Preservative                                    | 0.05% Sodium Azide.                                                                                                                     |
| Cellular Localization                           | Cytoplasm; Nucleus domain                                                                                                               |
| Positive Control                                | Mouse liver                                                                                                                             |
| Preparation and Storage                         | Store at +4 degree C after thawing. Aliquot store at -20 degree C or -80 degree C. Avoid repeated freeze/thaw cycles.                   |

ADDITIONAL INFORMATION

|                                                     |                                                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for anti-CK-18 antibody | Cytokeratin 18 is an acidic keratin which is found primarily in non squamous epithelia and is present in a majority of adenocarcinomas and ductal carcinomas but not in squamous cell carcinomas. Cytokeratin 18 exists in combination with Cytokeratin 8, a basic keratin. Hepatocellular carcinomas have been reportedly defined by the use of antibodies that recognize only Cytokeratins 8 and 18. |
