

## Human loricrin ELISA Kit | LOR elisa kit

Human Loricrin, LOR ELISA Kit

CATALOG #  
**AAA112551**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

loricrin; Human Loricrin; LOR ELISA Kit; Human Loricrin (LOR) ELISA kit; MGC111513; ; LOR elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                     |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                               |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of human LOR. No significant cross-reactivity or interference between human LOR and analogues was observed. |
| Sequence Length         | 312                                                                                                                                                                                 |
| Samples                 | Serum, plasma, tissue homogenates, cell lysates                                                                                                                                     |
| Assay Type              | Quantitative Sandwich                                                                                                                                                               |
| Detection Range         | 25 pg/ml-1600 pg/ml                                                                                                                                                                 |
| Sensitivity             | < 6.25 pg/ml                                                                                                                                                                        |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay): CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess.                                    |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays): CV%<10%. Three samples of known concentration were tested in twenty assays to assess.                                             |
| Preparation and Storage | Unopened test kits should be stored at 2 to 8 degree C upon receipt. Please refer to pdf manual for further storage instructions.                                                   |

### ADDITIONAL INFORMATION

#### Related Product Information for LOR elisa kit

**Principle of the Assay:** This assay employs the quantitative sandwich enzyme immunoassay technique. Antibody specific for LOR has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any LOR present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for LOR is added to the wells. After washing, avidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of LOR bound in the initial step. The color development is stopped and the intensity of the color is measured.
