

## Mouse dickkopf homolog 3 (Xenopus laevis) ELISA Kit | DKK3 elisa kit

Mouse Dickkopf-related protein 3, DKK3 ELISA Kit

CATALOG #  
**AAA113007**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

dickkopf homolog 3 (Xenopus laevis); Mouse Dickkopf-related protein 3; DKK3 ELISA Kit; Mouse Dickkopf-related protein 3 (DKK3) ELISA kit; REIC; RIG; RIG-like 5-6; RIG-like 7-1; dickkopf 3; dickkopf homolog 3; regulated in glioma; DKK3 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                       |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Mouse                                                                                                                                                                                 |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of mouse DKK3. No significant cross-reactivity or interference between mouse DKK3 and analogues was observed. |
| Sequence Length         | 349                                                                                                                                                                                   |
| Samples                 | serum, plasma, tissue homogenates                                                                                                                                                     |
| Assay Type              | Quantitative Sandwich                                                                                                                                                                 |
| Detection Range         | 9.4 pg/ml -600 pg/ml                                                                                                                                                                  |
| Sensitivity             | <2.35 pg/ml.                                                                                                                                                                          |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay): CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess                                       |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays): CV%<10%. Three samples of known concentration were tested in twenty assays to assess.                                               |
| Preparation and Storage | Unopened test kits should be stored at 2 to 8 degree C upon receipt. Please refer to pdf manual for further storage instructions.                                                     |

### ADDITIONAL INFORMATION

#### Related Product Information for DKK3 elisa kit

**Principle of the Assay:** This assay employs the quantitative sandwich enzyme immunoassay technique. Antibody specific for DKK3 has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any DKK3 present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for DKK3 is added to the wells. After washing, avidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of DKK3 bound in the initial step. The color development is stopped and the intensity of the color is measured.
