

## Early E3A 12.5 kDa protein Recombinant Protein

Recombinant Human adenovirus C serotype 5 Early E3A 12.5 kDa protein

CATALOG #  
AAA115065

HOST  
E Coli or Yeast or Baculovirus or Mammalian Cell

### PRODUCT SYNONYMS

Early E3A 12.5 kDa protein; Recombinant Human adenovirus C serotype 5 Early E3A 12.5 kDa protein; Early E3A 12.5 kDa protein recombinant protein

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                     |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Host                    | E Coli or Yeast or Baculovirus or Mammalian Cell                                                                                                                                                    |
| Purity/Purification     | Greater or equal to 85% purity as determined by SDS-PAGE.                                                                                                                                           |
| Form/Format             | Lyophilized or liquid (Format to be determined during the manufacturing process)                                                                                                                    |
| Sequence Positions      | 1-107, Full length protein                                                                                                                                                                          |
| Sequence                | MLSGEAEQLR LKHLVHCRRH KCFARDSGEF CYFELPEDHI EGPAHGVRTL AQGELARSLI REFTQRPLLV ERDRGPCVLT VICNCPNLGL HQDLCCHLCA EYNKYRN                                                                               |
| Sequence Length         | 107                                                                                                                                                                                                 |
| Species                 | Human adenovirus C serotype 5 (HAdV-5) (Human adenovirus 5)                                                                                                                                         |
| Preparation and Storage | Store at -20 degrees C. For long-term storage, store at -20 degrees C or -80 degrees C. Store working aliquots at 4 degrees C for up to one week. Repeated freezing and thawing is not recommended. |

### NCBI AND UNIPROT INFORMATION

|                           |                            |
|---------------------------|----------------------------|
| NCBI GI #                 | 56160551                   |
| NCBI Accession #          | AP_000218.1                |
| NCBI GenBank Nucleotide # | AC_000008.1                |
| UniProt Accession #       | P06496; Q6VGU1             |
| Molecular Weight          | 12,347 Da                  |
| NCBI Official Full Name   | E3 12.5K                   |
| UniProt Protein Name      | Early E3A 12.5 kDa protein |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
