

Human Adiponectin ELISA Kit | ADIPOQ elisa kit

Human Adiponectin PicoKine ELISA Kit

CATALOG #
AAA11568

REACTIVITY
Human

PRODUCT SYNONYMS

Adiponectin; Human Adiponectin PicoKine ELISA Kit; adiponectin; C1Q and collagen domain containing; 30 kDa adipocyte complement related protein; 30 kDa adipocyte complement-related protein; ACDC; ACRP30; ADIPO_HUMAN; Adipocyte; Adipocyte C1q and collagen domain containing protein; Adipocyte complement related 30 kDa protein; Adipocyte complement related protein of 30 kDa; Adipocyte complement-related 30 kDa protein; Adipoq; Adipose most abundant gene transcript 1; Adipose most abundant gene transcript 1 protein; Adipose specific collagen like factor; ADIPQTL1; ADPN; apM-1; APM1; C1q and collagen domain-containing protein; GBP28; Gelatin binding protein; Gelatin binding protein 28; Gelatin-binding protein; ADIPOQ elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	Natural and recombinant Human ADIPOQ
Sequence Length	244
Samples	Cell culture supernatants, serum, plasma (heparin, EDTA) and urine
Detection Range	1.56 ng/ml - 100 ng/ml
Sensitivity	<60 pg/ml
Intra-assay Precision	Three samples of known concentration were tested on one plate to assess intra-assay precision.
Inter-assay Precision	Three samples of known concentration were tested in separate assays to assess inter-assay precision.
Preparation and Storage	Store at 4 degree C for 6 months, at -20 degree C for 12 months. Avoid multiple freeze-thaw cycles (Shipped with wet ice.)

ADDITIONAL INFORMATION

Related Product Information for ADIPOQ elisa kit	Background: Adiponectin (ADPN) is a hormone secreted by adipocytes that regulates energy homeostasis and glucose and lipid metabolism. Adiponectin is a new member of the family of soluble defense collagens, in hematopoiesis and immune responses. It is an important negative regulator in hematopoiesis and immune systems and raise the possibility that it may be involved in ending inflammatory responses through its inhibitory functions. Adiponectin is mapped to 3q27 and can protect the organism from systemic inflammation by promoting the clearance of early apoptotic cells by macrophages through a receptor-dependent pathway involving calreticulin. The standard product used in this kit is the product of gene recombination, consisting of 226 (19-244) amino acids with the molecular mass of 36KDa after glycosylation. Principle of the Assay: The Picokine™ Human ADIPOQ Pre-Coated ELISA (Enzyme-Linked Immunosorbent Assay) kit is a solid-phase immunoassay specially designed to measure Human ADIPOQ with a 96-well strip plate that is pre-coated with antibody specific for ADIPOQ. The detection antibody is a biotinylated antibody specific for ADIPOQ. The capture antibody is monoclonal antibody from mouse and the detection antibody is polyclonal antibody from goat. The kit contains recombinant Human ADIPOQ with immunogen: Expression system for standard: NS0; Immunogen sequence: E19-N244. The kit is analytically validated with ready-to-use reagents. To measure Human ADIPOQ, add standards and samples to the wells, then add the biotinylated detection antibody. Wash the wells with PBS or TBS buffer, and add Avidin-Biotin-Peroxidase Complex (ABC-HRP). Wash away the unbounded ABC-HRP with PBS or TBS buffer and add TMB. TMB is an HRP substrate and will be catalyzed to produce a blue color product, which changes into yellow after adding the acidic stop solution. The absorbance of the yellow product at 450nm is linearly proportional to Human ADIPOQ in the sample. Read the absorbance of the yellow product in each well using a plate reader, and benchmark the sample wells' readings against the standard curve to determine the concentration of Human ADIPOQ in the sample.

NCBI AND UNIPROT INFORMATION

NCBI GeneID	9370
UniProt Accession #	A8K660; Q15848
Molecular Weight	26,414 Da
NCBI Official Synonym Full Names	adiponectin, C1Q and collagen domain containing
NCBI Official Symbol	ADIPOQ
NCBI Official Synonym Symbols	ACDC; ADPN; APM1; APM-1; GBP28; ACRP30; ADIPQTL1
NCBI Protein Information	adiponectin; gelatin-binding protein 28; adipose specific collagen-like factor; 30 kDa adipocyte complement-related protein; adipocyte complement-related 30 kDa protein; adipose most abundant gene transcript 1 protein
UniProt Protein Name	Adiponectin
UniProt Gene Name	ADIPOQ
UniProt Entry Name	A8K660_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
