

Tail virion protein G9P (IX) Recombinant Protein | IX recombinant protein

Recombinant Enterobacteria phage M13 Tail virion protein G9P (IX)

CATALOG # AAA115802	HOST E Coli or Yeast or Baculovirus or Mammalian Cell
-------------------------------	---

PRODUCT SYNONYMS

Tail virion protein G9P (IX); Recombinant Enterobacteria phage M13 Tail virion protein G9P (IX); Recombinant Tail virion protein G9P (IX); Tail virion protein G9P; Coat protein C; polypeptide II G9P; IX recombinant protein

PRODUCT SPECIFICATIONS

Host	E Coli or Yeast or Baculovirus or Mammalian Cell
Purity/Purification	Greater or equal to 85% purity as determined by SDS-PAGE.
Form/Format	Lyophilized or liquid (Format to be determined during the manufacturing process)
Sequence Positions	1-32aa; Full Length
Sequence	MSVLVYSFAS FVLGWCLRSG ITYFTRLMET SS
Species	Enterobacteria phage M13 (Bacteriophage M13)
Preparation and Storage	Store at -20 degree C. For extended storage, store at -20 or -80 degree C.

ADDITIONAL INFORMATION

Related Product Information for IX recombinant protein	May initiate with G7P the virion concomitant assembly-budding process, by interacting with the packaging signal of the viral genome. The assembly-budding takes place at the host inner membrane. In turn, G7P and G9P are present at the end of the filamentous virion that emerges first from the bacterial host.
Product Categories/Family for IX recombinant protein	Microbiology

NCBI AND UNIPROT INFORMATION

NCBI GI #	17426222
NCBI GeneID	927332
NCBI Accession #	NP_510889.1
NCBI GenBank Nucleotide #	NC_003287.2
UniProt Accession #	P03677 ; Z9BPM3
Molecular Weight	19.7 kDa

NCBI Official Full Name	structural protein
NCBI Official Symbol	IX
NCBI Protein Information	minor coat protein

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
