

Rat IFN gamma ELISA Kit | IFNG elisa kit

Rat IFN gamma PicoKine ELISA Kit

CATALOG #
AAA11587

REACTIVITY
Rat

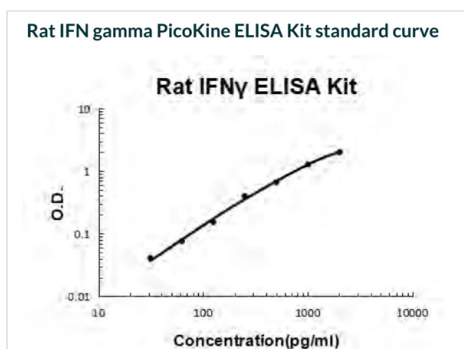

PRODUCT SYNONYMS

IFN gamma; Rat IFN gamma PicoKine ELISA Kit; Interferon gamma; interferon; gamma; IFNG; IFG; IFI; IFN Gamma; IFN Immune; IFN-gamma; IFNG_HUMAN; Immune Interferon; Interferon Gamma Precursor; Macrophage Activating Factor; MAF; T Cell Interferon; Type II Interferon; IFNG elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	Natural and recombinant Rat Ifng
Sequence Length	156
Samples	Cell culture supernatants and serum
Detection Range	31.2 pg/ml - 2,000 pg/ml
Sensitivity	<6 pg/ml
Intra-assay Precision	Three samples of known concentration were tested on one plate to assess intra-assay precision.
Inter-assay Precision	Three samples of known concentration were tested in separate assays to assess inter-assay precision.
Preparation and Storage	Store at 4 degree C for 6 months, at -20 degree C for 12 months. Avoid multiple freeze-thaw cycles (Shipped with wet ice.)

ADDITIONAL INFORMATION

Related Product Information for IFNG elisa kit	Background: Interferon-gamma (IFN-gamma) is an inflammatory cytokine that has been implicated in the development of fibrosis in inflamed tissues. The production of IFN-gamma, which is under genetic control, can influence the development of fibrosis in lung allografts. IFN-gamma is also produced by natural killer (NK) cells and most prominently by CD8 cytotoxic T cells, and is vital for the control of microbial pathogens. Interferon gamma is believed to be crucial for host defence against many infections. Genetically determined variability in IFN-gamma and expression might be important for the development of tuberculosis. In addition to having antiviral activity, IFN-gamma has important immunoregulatory functions. IFN-gamma plays an important role in the control of neointima proliferation. Principle of the Assay: The Picokine™ Rat Ifng Pre-Coated ELISA (Enzyme-Linked Immunosorbent Assay) kit is a solid-phase immunoassay specially designed to measure Rat Ifng with a 96-well strip plate that is pre-coated with antibody specific for Ifng. The detection antibody is a biotinylated antibody specific for Ifng. The capture antibody is monoclonal antibody from mouse and the detection antibody is polyclonal antibody from goat. The kit contains recombinant Rat Ifng with immunogen: Expression system for standard: E.coli; Immunogen sequence: E23-C156. The kit is analytically validated with ready-to-use reagents. To measure Rat Ifng, add standards and samples to the wells, then add the biotinylated detection antibody. Wash the wells with PBS or TBS buffer, and add Avidin-Biotin-Peroxidase Complex (ABC-HRP). Wash away the unbounded ABC-HRP with PBS or TBS buffer and add TMB. TMB is an HRP substrate and will be catalyzed to produce a blue color product, which changes into yellow after adding the acidic stop solution. The absorbance of the yellow product at 450nm is linearly proportional to Rat Ifng in the sample. Read the absorbance of the yellow product in each well using a plate reader, and benchmark the sample wells' readings against the standard curve to determine the concentration of Rat Ifng in the sample.

NCBI AND UNIPROT INFORMATION

NCBI GI #	124482
NCBI GeneID	25712
UniProt Accession #	P01581
Molecular Weight	17,918 Da
NCBI Official Full Name	Interferon gamma
NCBI Official Synonym Full Names	interferon gamma
NCBI Official Symbol	Ifng
NCBI Official Synonym Symbols	IFNG2
NCBI Protein Information	interferon gamma; IFN-gamma
UniProt Protein Name	Interferon gamma
UniProt Gene Name	Ifng
UniProt Synonym Gene Names	IFN-gamma
UniProt Entry Name	IFNG_RAT

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
