

RNA-binding protein with multiple splicing (RBPMS) Recombinant Protein | RBPMS recombinant protein

Recombinant Human RNA-binding protein with multiple splicing (RBPMS)

CATALOG # AAA116880	HOST E Coli or Yeast or Baculovirus or Mammalian Cell
-------------------------------	---

PRODUCT SYNONYMS

RNA-binding protein with multiple splicing (RBPMS); Recombinant Human RNA-binding protein with multiple splicing (RBPMS); RBPMS recombinant protein

PRODUCT SPECIFICATIONS

Host	E Coli or Yeast or Baculovirus or Mammalian Cell
Purity/Purification	Greater or equal to 85% purity as determined by SDS-PAGE.
Form/Format	Lyophilized or liquid (Format to be determined during the manufacturing process)
Sequence Positions	1-196aa; Full Length
Sequence	MNNGGKAEKE NTPSEANLQE EEVRTLFVSG LPLDIKPREL YLLFRPFKGY EGSLIKLTSK QPVGFSFDS RSEAEAAKNA LNGIRFDPEI PQTLRLEFAK ANTKMAKNKL VGTPNPSTPL PNTVPQFIAR EPYELTPAL YPSSPEVWAP YPLPAELAP ALPPPAFTYP ASLHAQMRWL PPSEATSQGW KSRQFC
Sequence Length	196
Species	Human
Production Note	Special Offer: The E Coli host-expressed protein is manufactured from a stock plasmid containing the protein gene. E Coli host-expressed protein is stocked in different unit sizes ranging from as small as 10 ug to as large as 1 mg. Bulk inventory is also available. The E Coli host-expressed protein has been ordered over and over again by researchers and has stood the test of time as both a robust protein and important target for the research community. It is part of our new program to make our most popular protein targets and corresponding hosts available in expanded unit sizes and with a quick processing time. Select E Coli host-expressed protein for the fastest delivery among all hosts. Please contact our or email to for more details.
Preparation and Storage	Store at -20 degrees C. For long-term storage, store at -20 degrees C or -80 degrees C. Store working aliquots at 4 degrees C for up to one week. Repeated freezing and thawing is not recommended.

ADDITIONAL INFORMATION

Related Product Information for RBPMS recombinant protein	This gene encodes a member of the RRM family of RNA-binding proteins. The RRM domain is between 80-100 amino acids in length and family members contain one to four copies of the domain. The RRM domain consists of two short stretches of conserved sequence called RNP1 and RNP2, as well as a few highly conserved hydrophobic residues. This protein has a single, putative RRM domain in its N-terminus. Alternative splicing results in multiple transcript variants encoding different isoforms.

NCBI AND UNIPROT INFORMATION

NCBI GI #	57164969
NCBI GeneID	11030
NCBI Accession #	NP_001008710.1
NCBI GenBank Nucleotide #	NM_001008710.2

UniProt Accession #	Q93062 ; Q92516 ; Q92517 ; Q92518 ; Q96J26 ; D3DSU9
Molecular Weight	28.8 kDa
NCBI Official Full Name	RNA-binding protein with multiple splicing isoform A
NCBI Official Synonym Full Names	RNA binding protein, mRNA processing factor
NCBI Official Symbol	RPBMS
NCBI Official Synonym Symbols	HERMES
NCBI Protein Information	RNA-binding protein with multiple splicing
UniProt Protein Name	RNA-binding protein with multiple splicing
UniProt Gene Name	RPBMS
UniProt Synonym Gene Names	HERMES; RBP-MS; Hermes

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
