

## BPI fold-containing family A member 2 (BPIFA2) Recombinant Protein | BPIFA2 recombinant protein

Recombinant Human BPI fold-containing family A member 2 (BPIFA2)

|                               |                                                                 |
|-------------------------------|-----------------------------------------------------------------|
| CATALOG #<br><b>AAA117238</b> | HOST<br><b>E Coli or Yeast or Baculovirus or Mammalian Cell</b> |
|-------------------------------|-----------------------------------------------------------------|

### PRODUCT SYNONYMS

BPI fold-containing family A member 2 (BPIFA2); Recombinant Human BPI fold-containing family A member 2 (BPIFA2); BPIFA2 recombinant protein

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                                                                                       |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Host                    | E Coli or Yeast or Baculovirus or Mammalian Cell                                                                                                                                                                                                                      |
| Purity/Purification     | Greater or equal to 85% purity as determined by SDS-PAGE.                                                                                                                                                                                                             |
| Form/Format             | Lyophilized or liquid (Format to be determined during the manufacturing process)                                                                                                                                                                                      |
| Sequence Positions      | 19-249aa, Full Length of Mature Protein                                                                                                                                                                                                                               |
