

Trastuzumab ELISA Kit

Trastuzumab ELISA Kit

CATALOG #
AAA120184

PRODUCT SYNONYMS

Trastuzumab; Trastuzumab ELISA Kit; timigutuzumab; 4D5-8; 4D5V8; Herceptin; rhuMab HER2; Trastuzumab elisa kit

PRODUCT SPECIFICATIONS

Assay Type	Quantitative Competitive
Samples	Serum and plasma
Detection Range	78.1 ng/mL — 5000 ng/mL
Intra-assay Precision	Intra-Assay Precision (Precision within an assay): <10%. Three samples of known concentration were tested sixteen times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-Assay Precision (Precision between assays): <15%. Three samples of known concentration were tested in twenty four separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C The stability of ELISA kit is determined by the loss rate of activity. The loss rate of this kit is less than 10% prior to the expiration date under appropriate storage condition.

ADDITIONAL INFORMATION

Related Product Information for Trastuzumab elisa kit

Principle of the Assay: This assay employs the quantitative competitive enzyme immunoassay technique. A recombinant human ErbB2 antigen has been pre-coated onto a microplate. Standards or samples are premixed with biotin-labeled antibody and then pipetted into the wells. Trastuzumab in the sample competitively binds to the pre-coated protein with biotin-labeled Trastuzumab. After washing away any unbound substances, Streptavidin-HRP is added to the wells. Following a wash to remove any unbound enzyme reagent, a substrate solution is added to the wells and color develops in inversely proportion to the amount of Trastuzumab bound in the initial step. The color development is stopped and the intensity of the color is measured.

Intended Uses: Used for the quantitative determination of Trastuzumab concentration in serum and plasma.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
