

## COVID 19 RBD (JN.1) Coronavirus ELISA Kit | COVID-19 elisa kit

SARS-CoV-2 RBD (JN.1) ELISA Kit

CATALOG #  
**AAA120711**

### PRODUCT SYNONYMS

COVID 19 RBD (JN.1) Coronavirus; SARS-CoV-2 RBD (JN.1) ELISA Kit; 2019 Novel Coronavirus; Coronavirus; CoV; COVID-19 virus; HCoV-2; Human Coronavirus 2019; SARS2; SARS-CoV-2; Severe acute respiratory syndrome coronavirus 2; COVID-19 elisa kit

### ADDITIONAL INFORMATION

#### Related Product Information for COVID-19 elisa kit

**Principle of the Assay:** This assay employs the quantitative sandwich enzyme immunoassay technique. An antibody specific for SARS-CoV-2 RBD (JN.1) has been pre-coated onto a microplate. Standards or samples are pipetted into the wells and any SARS-CoV-2 RBD (JN.1) Antigen present is bound by the immobilized antibody. After washing away any unbound substances, a biotin-labeled antibody specific for SARS-CoV-2 RBD (JN.1) is added to the wells. After washing away any unbound substances, Streptavidin-HRP is added to the wells. Following a wash to remove any unbound enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of SARS-CoV-2 RBD (JN.1) Antigen bound in the initial step. The color development is stopped and the intensity of the color is measured.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
