### PRODUCT SYNONYMS

F/Fusion glycoprotein F0; Monoclonal Recombinant Antibody; Research Grade Anti-RSV F/Fusion glycoprotein F0 (hRSV90); F; Fusion glycoprotein F0; Fusion glycoprotein F2; p27; Intervening segment; Pep27; Peptide 27; Fusion glycoprotein F1; F0 recombinant antibody

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                      |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Host                    | Mammalian Cells                                                                                                                                                                      |
| Reactivity              | Human respiratory syncytial virus A (strain A2)                                                                                                                                      |
| Clonality               | Monoclonal                                                                                                                                                                           |
| Isotype                 | IgG1                                                                                                                                                                                 |
| Clone Number            | hRSV90                                                                                                                                                                               |
| Purity/Purification     | >95% as determined by SDS-PAGE.<br>Protein A/G purified from cell culture supernatant.                                                                                               |
| Form/Format             | Liquid; 0.01M PBS, pH 7.4.                                                                                                                                                           |
| Concentration           | 1.25mg/ml (varies by lot)                                                                                                                                                            |
| Species                 | Human                                                                                                                                                                                |
| Preparation and Storage | Use a manual defrost freezer and avoid repeated freeze-thaw cycles. Store at 4 degree C short term (1-2 weeks).<br>Store at -20 degree C 12 months. Store at -80 degree C long term. |

NCBI AND UNIPROT INFORMATION

|                            |                        |
|----------------------------|------------------------|
| NCBI GI #                  | 138251                 |
| UniProt Accession #        | P03420; P88811         |
| Molecular Weight           | 63,453 Da              |
| NCBI Official Full Name    | Fusion glycoprotein F0 |
| UniProt Protein Name       | Fusion glycoprotein F0 |
| UniProt Gene Name          | F                      |
| UniProt Synonym Gene Names | Protein F              |
| UniProt Entry Name         | FUS_HRSVA              |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
