

Human Free Kappa Light Chain ELISA Kit

Human Free Kappa Light Chain ELISA Kit

CATALOG #
AAA120808

REACTIVITY
Human

PRODUCT SYNONYMS

Free Kappa Light Chain; Human Free Kappa Light Chain ELISA Kit; Free Kappa Light Chain elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids
Detection Range	1-400mg/dl
Sensitivity	0.63mg/dl
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for Free Kappa Light Chain elisa kit	Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human free kappa-IgLC antibody. free kappa-IgLC present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human free kappa-IgLC Antibody is added and binds to free kappa-IgLC in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated free kappa-IgLC antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human free kappa-IgLC. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm. Intended Uses: This sandwich kit is for the accurate quantitative detection of Human Free Kappa Light Chain (also known as free kappa-IgLC) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.
---	---

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
