

Rat Beta-Crosslaps (bCTX) ELISA Kit | bCTX elisa kit

Rat Beta-Crosslaps (bCTX) ELISA Kit

CATALOG #
AAA121146

REACTIVITY
Rat

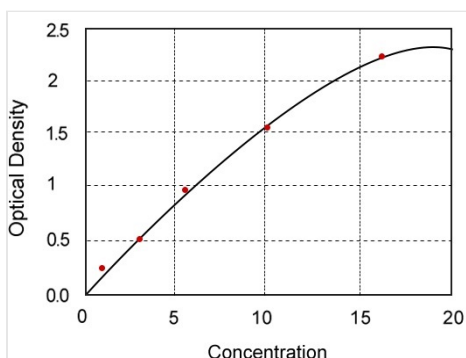

PRODUCT SYNONYMS

Beta-Crosslaps (bCTX); Rat Beta-Crosslaps (bCTX) ELISA Kit; bCTX elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.5ng/L - 190ng/L
Sensitivity	0.24ng/L
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for bCTX elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Rat Beta-Crosslaps (also known as Apo-E) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Rat Apo-E antibody. Apo-E present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Rat Apo-E Antibody is added and binds to Apo-E in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated Apo-E antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Rat Apo-E. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
