

## Rat Vasodilator Stimulated Phosphoprotein (VASP) ELISA Kit | VASP elisa kit

Rat Vasodilator Stimulated Phosphoprotein (VASP) ELISA Kit

CATALOG #  
**AAA121190**

REACTIVITY  
**Rat**

### PRODUCT SYNONYMS

Vasodilator Stimulated Phosphoprotein (VASP); Rat Vasodilator Stimulated Phosphoprotein (VASP) ELISA Kit; VASP elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                          |
|-------------------------|--------------------------------------------------------------------------|
| Reactivity              | Rat                                                                      |
| Sequence Length         | 193                                                                      |
| Samples                 | Serum, plasma, cell culture supernates, cell lysates, tissue homogenates |
| Assay Type              | Quantitative Sandwich                                                    |
| Detection Range         | 2ng/L - 600ng/L                                                          |
| Sensitivity             | 0.93ng/L                                                                 |
| Intra-Assay             | CV<8%                                                                    |
| Inter-Assay             | CV<10%                                                                   |
| Preparation and Storage | Store at 2 to 8 degree C for 6 months.                                   |

### ADDITIONAL INFORMATION

#### Related Product Information for VASP elisa kit

**Intended Uses:** This sandwich kit is for the accurate quantitative detection of Rat Vasodilator Stimulated Phosphoprotein (also known as VASP) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

**Principles of the Assay:** This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Rat VASP antibody. VASP present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Rat VASP Antibody is added and binds to VASP in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated VASP antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Rat VASP. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

NCBI AND UNIPROT INFORMATION

|                         |               |
|-------------------------|---------------|
| NCBI GI #               | 958796942     |
| Molecular Weight        | 19,349 Da     |
| NCBI Official Full Name | VASP, partial |
| UniProt Protein Name    | VASP          |
| UniProt Gene Name       | VASP          |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
