ADDITIONAL INFORMATION

Related Product Information for WNT5A elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of Rat Wingless Type MMTV Integration Site Family, Member 5A (also known as WNT5A) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates. Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Rat WNT5A antibody. WNT5A present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Rat WNT5A Antibody is added and binds to WNT5A in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated WNT5A antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Rat WNT5A. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
