

# Porcine Signal transducer and activator of transcription 1, STAT1 ELISA Kit | STAT1 elisa kit

Porcine Signal transducer and activator of transcription 1, STAT1 ELISA Kit

CATALOG #  
**AAA121344**

REACTIVITY  
**Porcine**

## PRODUCT SYNONYMS

Signal transducer and activator of transcription 1; STAT1; Porcine Signal transducer and activator of transcription 1; STAT1 ELISA Kit; STAT1 elisa kit

## PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                  |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Porcine                                                                                                                                                                                          |
| Sequence Length         | 757                                                                                                                                                                                              |
| Samples                 | Serum, Plasma, Cell Culture Supernates, Cell Lysates, Tissue Homogenates                                                                                                                         |
| Assay Type              | Quantitative Sandwich                                                                                                                                                                            |
| Detection Range         | 8ng/L-2000ng/L                                                                                                                                                                                   |
| Sensitivity             | 4.27ng/L                                                                                                                                                                                         |
| Intra-assay Precision   | Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%                              |
| Inter-assay Precision   | Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10% |
| Preparation and Storage | Store at 2 to 8 degree C for 6 months.                                                                                                                                                           |

| Related Product Information for STAT1 elisa kit | <p>Intended Uses: This sandwich kit is for the accurate quantitative detection of Porcine RAR Related Orphan Receptor Gamma (also known as RORG) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.</p> <p>Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Porcine RORG antibody. RORG present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Porcine RORG Antibody is added and binds to RORG in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated RORG antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Porcine RORG. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.</p> |
