

## Mouse Transcription factor A, mitochondrial (TFAM) ELISA Kit | TFAM elisa kit

Mouse Transcription factor A, mitochondrial (TFAM) ELISA Kit

CATALOG #  
**AAA121545**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

Transcription factor A; mitochondrial (TFAM); Mouse Transcription factor A; mitochondrial (TFAM) ELISA Kit; TFAM elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                          |
|-------------------------|--------------------------------------------------------------------------|
| Reactivity              | Mouse                                                                    |
| Sequence Length         | 149                                                                      |
| Samples                 | Serum, plasma, cell culture supernates, cell lysates, tissue homogenates |
| Assay Type              | Quantitative Sandwich                                                    |
| Detection Range         | 5ng/L - 1500ng/L                                                         |
| Sensitivity             | 2.41ng/L                                                                 |
| Intra-Assay             | CV<8%                                                                    |
| Inter-Assay             | CV<10%                                                                   |
| Preparation and Storage | Store at 2 to 8 degree C for 6 months.                                   |

### ADDITIONAL INFORMATION

#### Related Product Information for TFAM elisa kit

**Intended Uses:** This sandwich kit is for the accurate quantitative detection of Mouse Transcription Factor A, Mitochondrial (also known as TFAM) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

**Principles of the Assay:** This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Mouse TFAM antibody. TFAM present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Mouse TFAM Antibody is added and binds to TFAM in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated TFAM antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Mouse TFAM. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
