Intended Uses: This sandwich kit is for the accurate quantitative detection of Mouse Chemokine Ligand 17 (also known as CCL17) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Mouse CCL17 antibody. CCL17 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Mouse CCL17 Antibody is added and binds to CCL17 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated CCL17 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Mouse CCL17. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
