

Mouse melanocyte stimulating hormone alpha (alpha-MSH) ELISA Kit | alpha-MSH elisa kit

Mouse melanocyte stimulating hormone alpha (alpha-MSH) ELISA Kit

CATALOG #
AAA121581

REACTIVITY
Mouse

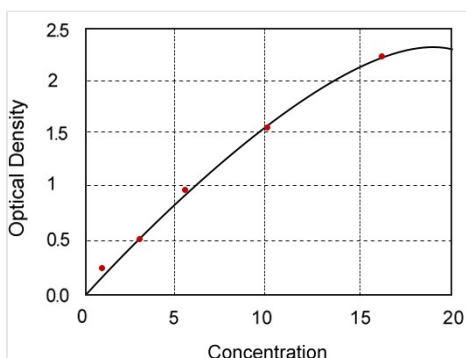

PRODUCT SYNONYMS

melanocyte stimulating hormone alpha (alpha-MSH); Mouse melanocyte stimulating hormone alpha (alpha-MSH) ELISA Kit; alpha-MSH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	20ng/L - 6000ng/L
Sensitivity	9.52ng/L
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for alpha-MSH elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Mouse Melanocyte Stimulating Hormone Alpha (also known as Alpha-MSH) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Mouse Alpha-MSH antibody. Alpha-MSH present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Mouse Alpha-MSH Antibody is added and binds to Alpha-MSH in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated Alpha-MSH antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Mouse Alpha-MSH. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
