ADDITIONAL INFORMATION

Related Product Information for PCI elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Mouse Troponin T Type 2, Cardiac (also known as TNNT2) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Mouse TNNT2 antibody. TNNT2 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Mouse TNNT2 Antibody is added and binds to TNNT2 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated TNNT2 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Mouse TNNT2. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
