ADDITIONAL INFORMATION

Related Product Information for Caspase-3/CPP32 elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of Rabbit Homeobox Protein Hox-B3 (also known as Caspase-3/CPP32) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates. Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Rabbit Caspase-3/CPP32 antibody. Caspase-3/CPP32 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Rabbit Caspase-3/CPP32 Antibody is added and binds to Caspase-3/CPP32 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated Caspase-3/CPP32 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Rabbit Caspase-3/CPP32. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
