ADDITIONAL INFORMATION

Related Product Information for DLK1 elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of Rabbit Delta Like 1 Homolog (also known as DLK1) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates. Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Rabbit DLK1 antibody. DLK1 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Rabbit DLK1 Antibody is added and binds to DLK1 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated DLK1 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Rabbit DLK1. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
