

Rabbit Pancreatic Amylase (PAMY) ELISA Kit | PAMY elisa kit

Rabbit Pancreatic Amylase (PAMY) ELISA Kit

CATALOG #
AAA121807

REACTIVITY
Rabbit

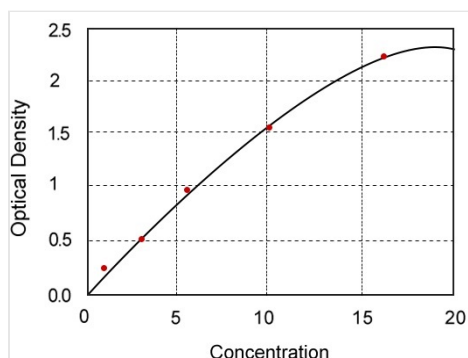

PRODUCT SYNONYMS

Pancreatic Amylase (PAMY); Rabbit Pancreatic Amylase (PAMY) ELISA Kit; PAMY elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	1ng/ml - 350ng/ml
Sensitivity	0.52ng/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for PAMY elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Rabbit Pancreatic Amylase (also known as PAMY) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Rabbit PAMY antibody. PAMY present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Rabbit PAMY Antibody is added and binds to PAMY in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated PAMY antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Rabbit PAMY. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
