

Chicken Fibrinogen Alpha (FGA) ELISA Kit | FGA elisa kit

Chicken Fibrinogen Alpha (FGA) ELISA Kit

CATALOG #
AAA121990

REACTIVITY
Chicken

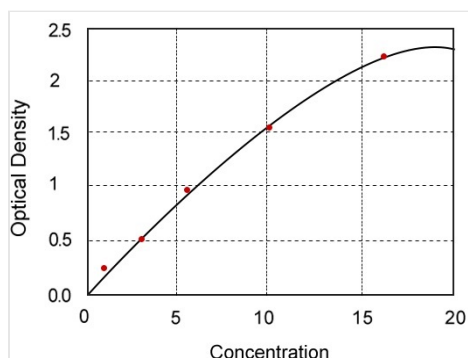

PRODUCT SYNONYMS

Fibrinogen Alpha (FGA); Chicken Fibrinogen Alpha (FGA) ELISA Kit; FGA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	20ng/ml - 6000ng/ml
Sensitivity	10.23ng/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for FGA elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Chicken Fibrinogen Alpha (also known as FGA) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Chicken FGA antibody. FGA present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Chicken FGA Antibody is added and binds to FGA in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated FGA antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Chicken FGA. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
