

Horse Lipopolysaccharides (LPS) ELISA Kit | LPS elisa kit

Horse Lipopolysaccharides (LPS) ELISA Kit

CATALOG #
AAA122052

REACTIVITY
Horse

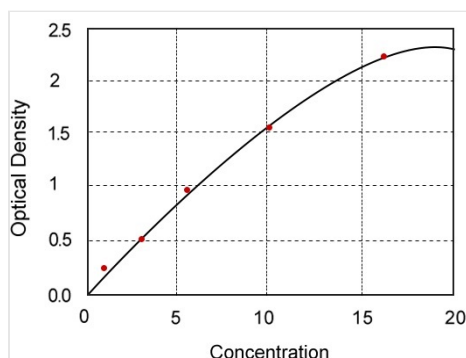

PRODUCT SYNONYMS

Lipopolysaccharides (LPS); Horse Lipopolysaccharides (LPS) ELISA Kit; LPS elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Horse
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	16EU/L - 3000EU/L
Sensitivity	9.28EU/L
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for LPS elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Horse Lipopolysaccharides (also known as LPS) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Horse LPS antibody. LPS present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Horse LPS Antibody is added and binds to LPS in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated LPS antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Horse LPS. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
