

Sheep Beta-Hydroxybutyric Acid (beta-OHB) ELISA Kit | beta-OHB elisa kit

Sheep Beta-Hydroxybutyric Acid (beta-OHB) ELISA Kit

CATALOG #
AAA122089

REACTIVITY
Sheep

PRODUCT SYNONYMS

Beta-Hydroxybutyric Acid (beta-OHB); Sheep Beta-Hydroxybutyric Acid (beta-OHB) ELISA Kit; beta-OHB elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.05mmol/L - 10mmol/L
Sensitivity	0.024mmol/L
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for beta-OHB elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Sheep Beta-Hydroxybutyric Acid (also known as B-OHB) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Sheep B-OHB antibody. B-OHB present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Sheep B-OHB Antibody is added and binds to B-OHB in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated B-OHB antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Sheep B-OHB. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
