

Bovine Malondialdehyde, MDA ELISA Kit | MDA elisa kit

Bovine malondialdehyde, MDA ELISA Kit

CATALOG #
AAA122156

REACTIVITY
Bovine

PRODUCT SYNONYMS

Malondialdehyde; MDA; Bovine malondialdehyde; MDA ELISA Kit; MDA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Bovine
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.2nmol/ml - 60nmol/ml
Sensitivity	0.11nmol/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for MDA elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Bovine Malondialdehyde (also known as MDA) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Bovine MDA antibody. MDA present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Bovine MDA Antibody is added and binds to MDA in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated MDA antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Bovine MDA. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
