

Bovine EGF-containing fibulin-like extracellular matrix protein 1 (EFEMP1) ELISA Kit | EFEMP1 elisa kit

Bovine EGF-containing fibulin-like extracellular matrix protein 1 (EFEMP1) ELISA Kit

CATALOG #
AAA122310

REACTIVITY
Bovine

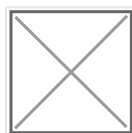

PRODUCT SYNONYMS

EGF-containing fibulin-like extracellular matrix protein 1 (EFEMP1); Bovine EGF-containing fibulin-like extracellular matrix protein 1 (EFEMP1) ELISA Kit; EFEMP1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Bovine
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.6ng/ml - 200ng/ml
Sensitivity	0.31ng/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for EFEMP1 elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Bovine EGF-containing Fibulin-like Extracellular Matrix Protein 1 (also known as EFEMP1) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Bovine EFEMP1 antibody. EFEMP1 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Bovine EFEMP1 Antibody is added and binds to EFEMP1 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated EFEMP1 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Bovine EFEMP1. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
