

Canine Fibrinogen, Fbg ELISA Kit | Fbg elisa kit

Canine Fibrinogen, Fbg ELISA Kit

CATALOG #
AAA122332

REACTIVITY
Canine

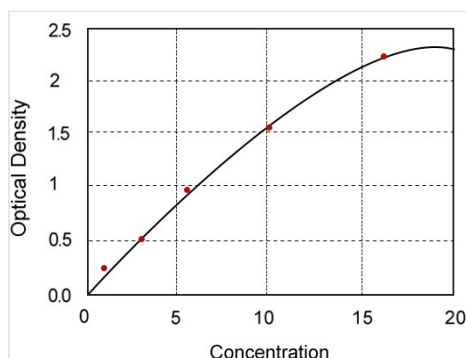

PRODUCT SYNONYMS

Fibrinogen; Fbg; Canine Fibrinogen; Fbg ELISA Kit; Fbg elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Canine
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.2nmol/L - 60nmol/L
Sensitivity	0.12nmol/L
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for Fbg elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Canine Total Homocystein (also known as HCY) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Canine HCY antibody. HCY present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Canine HCY Antibody is added and binds to HCY in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated HCY antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Canine HCY. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
