

Cat Bone specific Alkaline Phosphatase, BAP ELISA Kit | BAP elisa kit

Cat Bone specific Alkaline Phosphatase, BAP ELISA Kit

CATALOG #
AAA122416

REACTIVITY
Cat

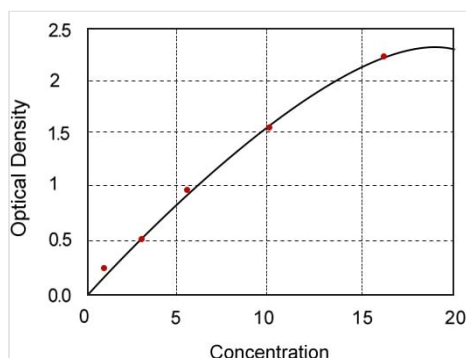

PRODUCT SYNONYMS

Bone specific Alkaline Phosphatase; BAP; Cat Bone specific Alkaline Phosphatase; BAP ELISA Kit; BAP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Cat
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.5ng/ml - 150ng/ml
Sensitivity	0.28ng/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for BAP elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Cat Bone Specific Alkaline Phosphatase (also known as BAP) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Cat BAP antibody. BAP present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Cat BAP Antibody is added and binds to BAP in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated BAP antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Cat BAP. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
