

Chicken Fibrinogen ELISA Kit

Chicken Fibrinogen ELISA Kit

CATALOG #
AAA122865

REACTIVITY
Chicken

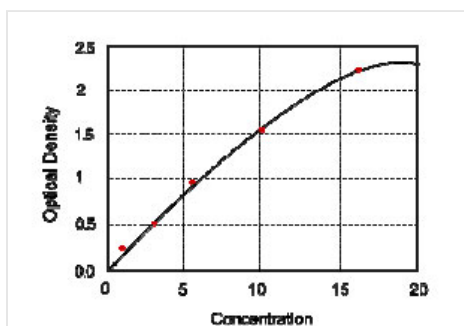

PRODUCT SYNONYMS

Fibrinogen; Chicken Fibrinogen ELISA Kit; Fibrinogen elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Sequence Length	126
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.05mg/ml - 15mg/ml
Sensitivity	0.023mg/ml
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for Fibrinogen elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Chicken Fibrinogen (also known as Fbg) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Chicken Fbg antibody. Fbg present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Chicken Fbg Antibody is added and binds to Fbg in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated Fbg antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Chicken Fbg. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

NCBI AND UNIPROT INFORMATION

NCBI GI #	148357768
NCBI Official Full Name	fibrinogen, partial

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
