

Human Phospho-NF-KB p65(Ser536) ELISA Kit

Human Phospho-NF-KB p65(Ser536) ELISA Kit

CATALOG #
AAA122965

REACTIVITY
Human

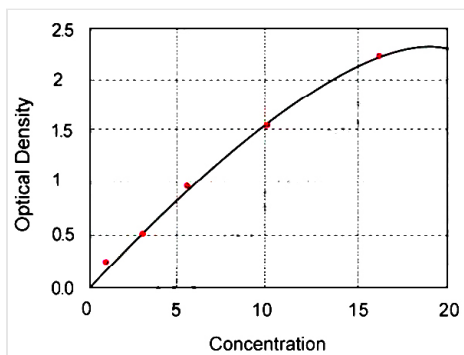

PRODUCT SYNONYMS

Phospho-NF-KB p65(Ser536); Human Phospho-NF-KB p65(Ser536) ELISA Kit; Phospho-NF-KB p65(Ser536) elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids
Detection Range	25-7000ng/L
Sensitivity	13.26ng/L
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for Phospho-NF-KB p65(Ser536) elisa kit	Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human pNF-kB p65(Ser536) antibody. pNF-kB p65(Ser536) present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human pNF-kB p65(Ser536) Antibody is added and binds to pNF-kB p65(Ser536) in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated pNF-kB p65(Ser536) antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human pNF-kB p65(Ser536). The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm. Intended Uses: This sandwich kit is for the accurate quantitative detection of Human Phospho-NF-KB P65(Ser536) (also known as pNF-kB p65(Ser536)) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.
