

Rat Non-Ester Fatty Acid, NEFA ELISA Kit | NEFA elisa kit

Rat Non-Ester Fatty Acid, NEFA ELISA Kit

CATALOG #
AAA123109

REACTIVITY
Rat

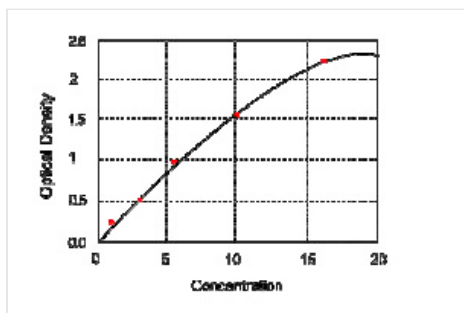

PRODUCT SYNONYMS

Non-Ester Fatty Acid; NEFA; Rat Non-Ester Fatty Acid; NEFA ELISA Kit; NEFA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, Plasma, Urine, Saliva, Cell Culture Supernates, Tissue Homogenates, Other Related Tissue Liquid
Assay Type	Quantitative Sandwich
Detection Range	0.05ng/ml-30ng/ml
Sensitivity	0.022ng/ml
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for NEFA elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Rat N-Methylpurine DNA Glycosylase (also known as MPG) in serum, plasma, Urine, Saliva, cell culture supernates, tissue homogenates, other related tissue Liquid.

Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Rat MPG antibody. MPG present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Rat MPG Antibody is added and binds to MPG in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated MPG antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Rat MPG. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
