

Mouse Occludin (OCLN) ELISA Kit | OCLN elisa kit

Mouse Occludin (OCLN) ELISA Kit

CATALOG #
AAA123129

REACTIVITY
Mouse

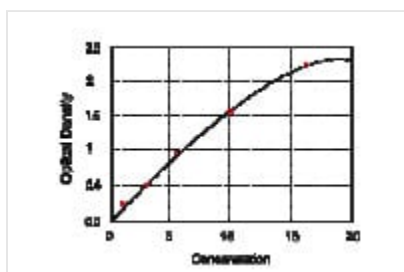

PRODUCT SYNONYMS

Occludin (OCLN); Mouse Occludin (OCLN) ELISA Kit; OCLN elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Sequence Length	522
Samples	Serum, plasma, cell culture supernates, ascites, tissue homogenates or other biological fluids
Assay Type	Quantitative Sandwich
Detection Range	20-3800ng/L
Sensitivity	9.97ng/L
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for OCLN elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Mouse Occludin (also known as OCLN) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.

Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Mouse OCLN antibody. OCLN present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Mouse OCLN Antibody is added and binds to OCLN in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated OCLN antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Mouse OCLN. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

NCBI AND UNIPROT INFORMATION

NCBI GI #	17864891
NCBI Official Full Name	occludin

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
