

Human HLA Class II Histocompatibility Antigen, DRB1 Beta Chain (HLA-DRB1) ELISA Kit | HLA-DRB1 elisa kit

Human HLA Class II Histocompatibility Antigen, DRB1 Beta Chain (HLA-DRB1) ELISA Kit

CATALOG #
AAA123150

REACTIVITY
Human

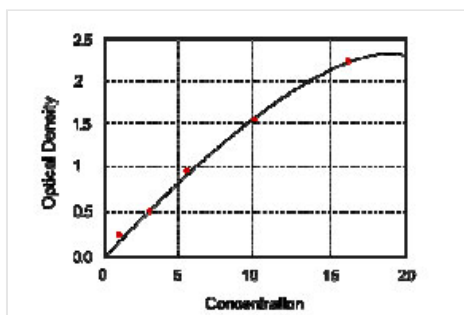

PRODUCT SYNONYMS

HLA Class II Histocompatibility Antigen; DRB1 Beta Chain (HLA-DRB1); Human HLA Class II Histocompatibility Antigen; DRB1 Beta Chain (HLA-DRB1) ELISA Kit; HLA-DRB1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernates, ascites, tissue homogenates or other biological fluids
Assay Type	Quantitative Sandwich
Detection Range	30-9000ng/L
Sensitivity	16.28ng/L
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for HLA-DRB1 elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of Human HLA Class 2 Histocompatibility Antigen, DRB1 Beta Chain (also known as HLA-DRB1) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids. Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human HLA-DRB1 antibody. HLA-DRB1 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human HLA-DRB1 Antibody is added and binds to HLA-DRB1 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated HLA-DRB1 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human HLA-DRB1. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
