

Canine Soluble CD36, SCD36 ELISA Kit | SCD36 elisa kit

Canine Soluble CD36, SCD36 ELISA Kit

CATALOG #
AAA123222

REACTIVITY
Canine

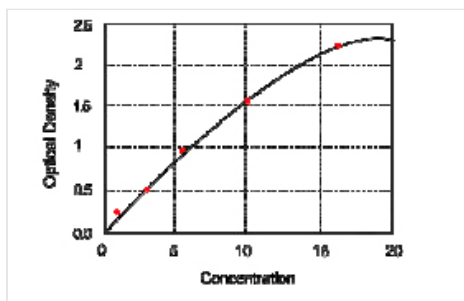

PRODUCT SYNONYMS

Soluble CD36; SCD36; Canine Soluble CD36; SCD36 ELISA Kit; SCD36 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Canine
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.05ng/ml - 15ng/ml
Sensitivity	0.013ng/ml
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for SCD36 elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Canine Soluble CD36 (also known as SCD36) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Canine SCD36 antibody. SCD36 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Canine SCD36 Antibody is added and binds to SCD36 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated SCD36 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Canine SCD36. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
