

Nuclear respiratory factor 2, NRF2 ELISA Kit | NRF2 elisa kit

Rat Nuclear respiratory factor 2, NRF2 ELISA Kit

CATALOG #
AAA123373

REACTIVITY
Rat

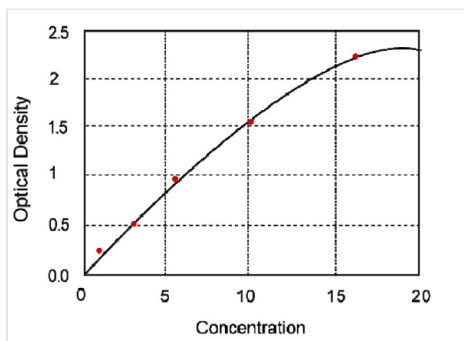

PRODUCT SYNONYMS

Nuclear respiratory factor 2; NRF2; Rat Nuclear respiratory factor 2; NRF2 ELISA Kit; NRF2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids
Detection Range	20-4500ng/L
Sensitivity	9.64ng/L
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for NRF2 elisa kit

Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Rat NRF2 antibody. NRF2 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Rat NRF2 Antibody is added and binds to NRF2 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated NRF2 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Rat NRF2. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

Intended Uses: This sandwich kit is for the accurate quantitative detection of Rat Nuclear respiratory factor 2 (also known as NRF2) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
